Whatever your needs, Trovex has got you covered.

A washroom solution created specifically for children, featuring vivid designs, sturdy fittings and a choice of height options - encouraging both hygiene and the imagination.
K2:12 cubicles

A washroom that is specifically designed for the needs of children, and makes them feel comfortable, encourages good hygiene. Choose a printed or solid colour laminate, while different door shapes and height options allow for the appropriate combination of supervision and privacy.

- Wide choice of laminate finishes and unique colourful designs, see page 76
- Door and division shape and height options
- Anodised aluminium ironmongery
- Anti-finger-trap hinges
- Indicator bolt with emergency release
- Adjustable height pedestal support
- Pre-drilled components for accurate on-site assembly
- Durable SGL (solid-grade laminate) panels
K2:12 duct panelling

Duct panels provide an excellent finish to a washroom with access to pipework for easy maintenance.

- Wide choice of laminate finishes and unique colourful designs, see page 76
- Full-height, cubicle-height or low-level options
- Easy access with a concealed clip fixing system
- Custom dimensions to suit your project
- Pre-drilled components for accurate on-site assembly
- Available as supply only or supply and install
- Durable SGL (solid-grade laminate) panels

Sanitaryware
